

What is Clarity Power Technology?

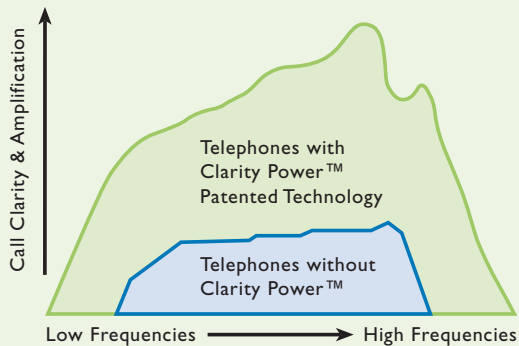

Clarity Power™ not only makes calls louder, but also easier to understand. The patented Clarity technology amplifies and shapes high frequencies to enhance communications for the millions of people who experience high frequency hearing loss, the most common type of hearing loss.

Clarity Power™ technology isn't just about amplifying phones. It's about helping people communicate as easily as possible. Knowing the sound of a loved one's voice is just the touch of a button away - that's the power of Clarity.

Hear every word Loud and Clear!

With amplified telephones and accessories from CLARITY.

Dealer

Improve your quality of life.

Communication is Important – Stay in Touch

Clarity Power™ technology allows people who are slightly to moderately hard of hearing to communicate once again, simply and - above all - effectively. Whether with amplified telephones or with accessories that can amplify the sound on your existing telephone, Clarity products now offer you an affordable way to improve the quality of your life many times over. In addition, you can adapt each and every Clarity telephone precisely to your own individual hearing needs. Unique intuitive features, such as additional amplification, adjustable sound or volume controls, as well as audible and visible call indicators, will bring the world back into your home.
